

LUXCITING

Dall'evoluzione della pellicola luminosa elettropilotata nasce, con la collaborazione del Designer Ely Rozemberg, la collezione **Luxciting** che ne intuisce innovativi impieghi in originale simbiosi con il vetro, dove questo antico materiale si imbeve di luce, seguendo le trame della fantasia degli autori. La fonte luminosa si presta a variazioni decorative che, come le collezioni tessili, possono rinnovarsi ad ogni stagione.

From the evolution of the Electro-controlled light emitting films is born the innovative **Luxciting Collection** in collaboration with the Designer Ely Rozenberg.

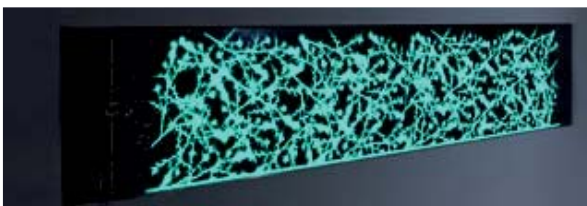

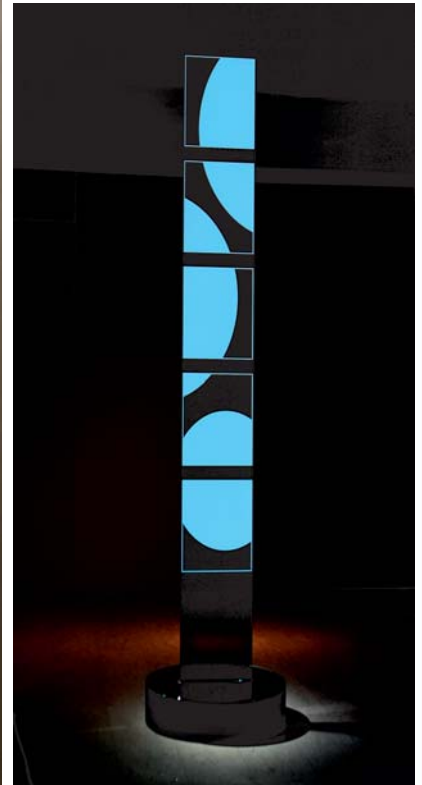

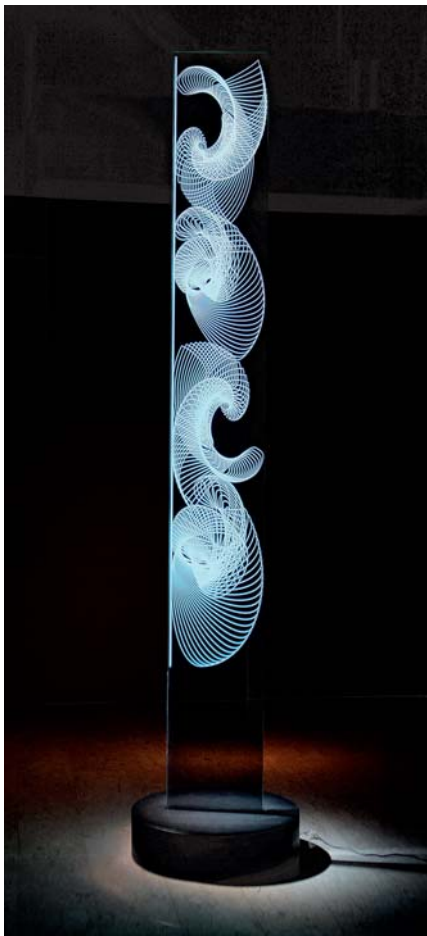

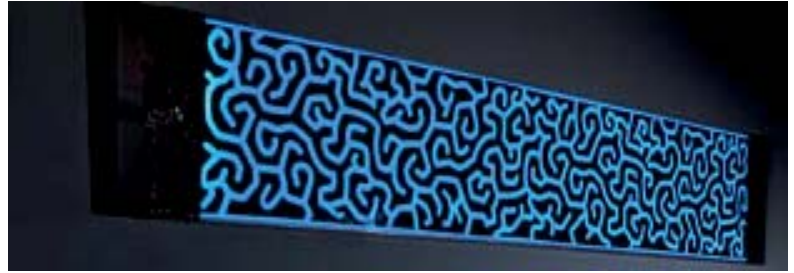

This lighting systems find new employs in an original symbiosis with the glass, where this ancient material full of light follows the author's fantasy.

The luminous source lends itself to decorative variations that, as the fashion collections, can be renewed on every season.
